Explanatory Note

This report on Form 6-K/A amends and restates in its entirety the Company's report on Form 6-K filed on May 17, 2004 (the Original 6-K). The Company has restated its US GAAP financial statements for the first quarter of 2004 for the reasons described in Note 5 to the financial statements included as a part of this report on Form 6-K/A. The Company's Brazilian GAAP financial statements are not affected by the restatement. The US GAAP earnings release included in the Original 6-K has not been revised to reflect the restatement, and should be disregarded. In addition, this report on Form 6-K/A does not purport to provide an update or a discussion of any other developments subsequent to May 17, 2004. For a discussion of events after that date, you should consult the Company's reports on Form 6-K filed subsequent to May 17, 2004.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Stockholders of Companhia Vale do Rio Doce:

We have reviewed the accompanying unaudited condensed consolidated balance sheet of Companhia Vale do Rio Doce and subsidiaries as of March 31, 2004, and the unaudited condensed consolidated statements of income, of cash flows and of changes in stockholders' equity for the three-month periods ended March 31, 2004 and 2003 and December 31, 2003. This interim financial information is the responsibility of the Company's management. The unaudited financial information of certain affiliates, the equity in earnings which total US\$ 10 million and US\$ 24 million for the three-month periods ended March 31 and December 31, 2003, respectively, and that of certain subsidiaries, which statements reflect total revenues of US\$ 34 million and US\$ 114 million for the three-month periods ended March 31 and December 31, 2003, respectively, were reviewed by other independent accountants whose reports thereon have been furnished to us.

We conducted our reviews in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures to financial data and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our reviews and the reports of the other auditors, we are not aware of any material modifications that should be made to the condensed consolidated interim financial information referred to above for them to be in conformity with accounting principles generally accepted in the United States of America.

We previously audited in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of Companhia Vale do Rio Doce and subsidiaries as of December 31, 2003, and the related consolidated statements of income, of changes in stockholders' equity, and cash flows for the year then ended (not presented herein) and in our report dated February 20, 2004, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of December 31, 2003 is fairly stated in all material respects in relation to the consolidated balance sheet from which it has been derived.

As discussed in Note 4 to the financial statements, the Company changed its method of accounting for asset retirement obligations, as from January 1, 2003 and, as discussed in Note 5 to the financial statements, the Company also changed its accounting policy for consolidation of variable interest entities as from January 1, 2004.

1 The Company and its operations

Companhia Vale do Rio Doce (CVRD) is a limited liability company, duly organized and existing under the laws of the Federative Republic of Brazil. Our operations are carried out through CVRD and its subsidiary companies, joint ventures and affiliates, and mainly consist of mining, non-ferrous metal production and logistics, as well as energy, aluminum and steel activities. Further details of our operations and those of our joint ventures and affiliates are described in Note 8.

The main operating subsidiaries we consolidate are as follows:

Subsidiary	% ownership	Head office location	Principal activity
Alumina do Norte do Brasil S.A. Alunorte	57	Brazil	Aluminum
Alumínio Brasileiro S.A. Albras (8)	51	Brazil	Aluminum
CADAM S.A. (2) (4)	37	Brazil	Kaolin

- (2) Through Caemi Mineração e Metalurgia S.A.
- (3) Merged with CVRD on August 29, 2003
- (4) Consolidated as from September 2003
- (5) Merged with CVRD on December 30, 2003
- (6) Formerly Sibra-Eletrosiderúrgica Brasileira S.A.
- (7) Through Caemi Mineração e Metalurgia S.A. and Belém Administrações e Participações Ltda.
- (8) Consolidated as from January 1, 2004 (See Note 5)

2 Basis of consolidation

All majority-owned subsidiaries where we have both share and management control are consolidated, with elimination of all significant intercompany accounts and transactions. Investments in unconsolidated affiliates and joint ventures are reported at cost plus our equity in undistributed earnings or losses. Included in this category are certain joint ventures in which we have majority ownership but, by force of shareholders' agreements, do not have effective management control. We provide for losses on equity investments with negative stockholders' equity where applicable (see Note 8).

We evaluate the carrying value of our listed investments relative to publicly available quoted market prices. If the quoted market price is below book value, and such decline is considered other than temporary, we write-down our equity investments to quoted market value.

Table of Contents

We define joint ventures as businesses in which we and a small group of other partners each participate actively in the overall entity management, based on a shareholders agreement. We define affiliates as businesses in which we participate as a minority stockholder but with significant influence over the operating and financial policies of the investee.

Investments in unincorporated joint ventures, formed for the purpose of investing in electrical energy projects, as proportionately consolidated.

3 Summary of significant accounting policies

Our condensed consolidated interim financial information for the three-month periods ended March 31, 2004, December 31, 2003 and March 31, 2003 is unaudited. However, in our opinion, such condensed consolidated financial information includes all adjustments, consisting only of normal recurring adjustments, necessary for a fair presentation of the results for interim periods. The results of operations for the three month period ended March 31, 2004 are not necessarily indicative of the results to be expected for the full fiscal year ending December 31, 2004.

In preparing the consolidated financial statements, we are required to use estimates to account for certain assets, liabilities, revenues and expenses. Our consolidated financial statements therefore include various estimates concerning the selection of useful lives of property, plant and equipment, provisions necessary for contingent liabilities, fair values assigned to assets and liabilities acquired in business combinations, income tax valuation allowances, employee post-retirement benefits and other similar evaluations, actual results may vary from our estimates.

4 Change in accounting policy in 2003

In June 2001, the FASB issued SFAS 143 Accounting for Asset Retirement Obligations . We adopted SFAS 143 as from January 1, 2003, and as a consequence an additional \$26 for asset retirement obligations was recorded as Others long-term liabilities , a net increase of \$11 in mine development costs was registered within Property, plant and equipment and a resulting charge of \$10 was registered as Change in Accounting Practice for Asset Retirement Obligations on the Statement of Income, net of income tax (\$15 gross of deferred income tax). Over time the liabilities will be accreted for the change in their present value and initial capitalized costs will be amortized over the useful lives of the related assets.

5 Revision in 2004

In December 2003, the FASB issued FIN 46R Consolidation of Variable Interest Entities, (revised December 2003) . The primary objectives of FIN 46R are to provide guidance on the identification of entities for which control is achieved through means other than through voting rights (variable interest entities or VIEs) and how to determine when and which business enterprise should consolidate the VIE (the primary beneficiary). This new model for consolidation applies to an entity in which either (1) the equity investors (if any) do not have a controlling financial interest or (2) the equity investment at risk is insufficient to finance that entity's activities without receiving additional subordinated financial support from other parties. In addition, FIN 46R requires that both the primary beneficiary and all other enterprises with a significant variable interest in a VIE make additional disclosures regarding the nature, purpose, size and activities of the VIE and the enterprise's maximum exposure to loss as a result of its involvement with the VIE.

The implementation date of FIN 46R is the first period ending after December 15, 2003 for Special Purpose Entities (SPEs) and as from January 1, 2004 for previously existing variable interest entities which are not SPEs. FIN 46R may be applied prospectively with a cumulative adjustment as of the date on which it is first applied or by restating previously issued financing statements for one or more years with a cumulative-effect adjustment as of the

beginning of the first year restated.

F - 9

Table of Contents

Albrás, an equity investee, was determined to be a VIE in accordance with FIN 46R and has been consolidated as from January 1, 2004. Accordingly financial information for the three-months ended March 31, 2004 has been restated to consolidate this entity. Below is a summary of the impacts on the previously presented un-audited condensed financial information for the three month period ended March 31, 2004:

	As previously Presented	Consolidation of Albrás	As Presented Herein
	(unaudited)	(unaudited)	(unaudited)
Balance Sheet			
Current assets	2,938	179	3,117
Property, plant and equipment	6,727	290	7,017

6 Income taxes

Income taxes in Brazil comprise federal income tax and social contribution, which is an additional federal tax. The statutory composite enacted tax rate applicable in the periods presented is 34% represented by a 25% federal income tax rate plus a 9% social contribution rate.

The amount reported as income tax expense in our consolidated financial statements is reconciled to the statutory rates as follows:

Table of Contents

We have certain tax incentives relative to our iron ore and manganese operations in Carajás and relative to alumina in Barcarena. The incentives relative to iron ore and manganese comprise full income tax exemption on defined production levels up to 2005 and partial exemption up to 2013. Both incentives relative to alumina expire in 2010. An amount equal to the tax saving must be appropriated to a reserve account within stockholders' equity and may not be distributed in the form of cash dividends.

Employer contributions

We previously disclosed in our consolidated financial statements for the year ended December 31, 2003, that we expected to contribute \$14 to our pension plan in 2004. As of March 31, 2004, \$3 of contributions have been made. We do not expect any change in our previous estimate.

10 Commitments and contingencies

- (a) At March 31, 2004, we had extended guarantees for borrowings obtained by affiliates and joint ventures in the amount of \$9, of which \$8 is denominated in United States dollars and the remaining \$1 in local currency, as follows:

Affiliate or Joint Venture	Amount of guarantee	Denominated currency	Purpose	Final maturity	Counter guarantees
SAMARCO	7	US\$	Debt guarantee	2008	None
VALESUL	1	R\$	Debt guarantee	2007	None
NIBRASCO	1	US\$	Debt guarantee	2004	Collateral Pledge
	<hr/>				
	9				
	<hr/>				

We expect no losses to arise as a result of the above guarantees. We charge commission for extending these guarantees in the case of Samarco.

We have not provided any significant guarantees since January 1, 2003 which would require fair value adjustments under FIN 45 Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others .

- (b) CVRD and its subsidiaries are defendants in numerous legal actions in the normal course of business. Based on the advice of our legal counsel, management believes that the provision made against contingent losses is sufficient to cover probable losses in connection with such actions.

F - 13

Table of Contents

The provision for contingencies and the related judicial deposits are composed as follows:

	March 31, 2004		December 31, 2003	
	Provision for Judicial contingencies deposits		Provision for Judicial contingencies deposits	
Labor claims	193	81	177	66
Civil claims	139	55	167	54
Tax related actions	318	287	285	279
Others	5	5	6	8
	655	428	635	407

Labor related actions principally comprise employee claims for (i) payment of time spent travelling from their residences to the work-place, (ii) additional payments for alleged dangerous or unhealthy working conditions and (iii) various other matters, often in connection with disputes about the amount of indemnities paid upon dismissal.

Civil actions principally relate to claims made against us by contractors in connection with losses alleged to have been incurred by them as a result of various past government economic plans during which full indexation of contracts for inflation was not permitted.

Tax related actions principally comprise our challenges of certain revenue taxes, VAT and of the tax on financial movements CPMF.

We continue to vigorously pursue our interests in all the above actions but recognize that probably we will incur some losses in the final instance, for which we have made provisions.

Our judicial deposits are made as required by the courts for us to be able to enter or continue a legal action. When judgment is favorable to us, we receive the deposits back; when unfavorable, the deposits are delivered to the prevailing party. An increase of \$5 for tax deposits during 2003 refers mainly to an action in which we challenged the annual limitation on use to our tax loss carryforwards.

Contingencies settled in the three-month period ended March 31, 2004, and 2003 and December 31, 2003 aggregated \$23, \$21 and \$19, respectively, and additional provisions aggregated \$11, \$30 and \$73, respectively.

In addition to the contingencies for which we have made provisions we have possible losses in connection with tax contingencies totaling \$309 and \$214 at March 31, 2004 and 2003, respectively, for which no provision is maintained.

- (c) We are defendants in two actions seeking substantial compensatory damages brought by the Municipality of Itabira, State of Minas Gerais, which we believe are without merit. Due to the remote likelihood that any loss will arise therefrom no provision has been made in the financial statements with respect to these two actions.

- (d) We and BNDES entered into a contract, known as the Mineral Risk Contract, in March 1997, relating to prospecting authorizations for mining regions where drilling and exploration are still in their early stages. The Mineral Risk Contract provides for the joint development of certain unexplored mineral deposits in approximately two million identified hectares of land in the Carajás region, as well as proportional participation in any financial benefits earned from the development of such resources. Iron ore and manganese deposits already identified and subject to development are specifically excluded from the Mineral Risk Contract.

Pursuant to the Mineral Risk Contract, we and BNDES each agreed to provide \$ 205 million, which represents half of the \$ 410 million in expenditures estimated as necessary to complete geological exploration and mineral resource development projects in the region

F - 14

Table of Contents

over a period of five years, which had already been extended for an additional period of two years and on April 28, 2004 was extended again for another 5 years. We will oversee these projects and BNDES will advance us half of our costs on a quarterly basis. Under the Mineral Risk Contract, as of March 31, 2004, the remaining contributions towards exploration and development activities totaled US\$ 77 million. In the event that either of us wishes to conduct further exploration and development after having spent such \$ 205 million, the contract provides that each party may either choose to match the other party's contributions, or may choose to have its financial interest proportionally diluted. If a party's participation in the project is diluted to an amount lower than 40% of the amount invested in connection with exploration and development projects, then the Mineral Risk Contract provides that the diluted party will lose all the rights and benefits provided for in the Mineral Risk Contract and any amounts previously contributed to the project.

Under the Mineral Risk Contract, BNDES has agreed to compensate us through a finder's fee production royalty on their share of mineral resources that are discovered and placed into production. This finder's fee is equal to 3.5% of the revenues derived from the sale of gold, silver and platinum group metals and 1.5% of the revenues derived from the sale of other minerals, including copper, except for gold and other minerals discovered at Serra Leste, for which the finder's fee is equal to 6.5% of revenues.

- (e) At the time of our privatization in 1997, we issued shareholder revenue interests known in Brazil as debentures to our then-existing shareholders, including the Brazilian Government. The terms of the debentures, were set to ensure that our pre-privatization shareholders, including the Brazilian Government, would participate alongside us in potential future financial benefits that we are able to derive from exploiting our mineral resources. On March 26, 2004 as a result of exploiting our mineral resources we declared a distribution of these debentures in the amount of \$ 2, payable as from April 1, 2004.
- (f) We use various judgments and assumptions when measuring our environmental liabilities and asset retirement obligations. Changes in circumstances, law or technology may affect our estimates and we periodically review the amounts accrued and adjust them as necessary. Our accruals do not reflect unasserted claims because we are currently not aware of any such issues. Also the amounts provided are not reduced by any potential recoveries under cost sharing, insurance or indemnification arrangements because such recoveries are considered uncertain. The changes are demonstrated as follows:

Balance as of January 31, 2004	81
Accretion expense	2
Cumulative translation adjustment	(1)
	—

Table of Contents

11 Segment and geographical information

In 1999 we adopted SFAS 131 Disclosures about Segments of an Enterprise and Related Information with respect to the information we present about our operating segments. SFAS 131 introduced a management approach concept for reporting segment information, whereby such information is required to be reported on the basis that the chief decision-maker uses internally for evaluating segment performance and deciding how to allocate resources to segments. Our business segments are currently organized as follows:

Ferrous products comprises iron ore mining and pellet production, as well as the Northern and Southern transportation systems, including railroads, ports and terminals, as they pertain to mining operations. Manganese mining and ferroalloys are also included in this segment.

Non-ferrous products comprises the production of non-ferrous minerals.

Logistics comprises our transportation systems as they pertain to the operation of our ships, ports and railroads for third-party cargos.

Holdings divided into the following sub-groups:

Aluminum comprises aluminum trading activities, alumina refining and aluminum metal smelting and investments in joint ventures and affiliates engaged in bauxite mining.

Steel comprises our investments in joint ventures and affiliates operating in the steel industry.

Others comprises our investments in joint ventures and affiliates engaged in other businesses.

Information presented to top management with respect to the performance of each segment is generally derived directly from the accounting records maintained in accordance with accounting practices generally accepted in Brazil together with certain minor inter-segment allocations.

Table of Contents**12 Derivative financial instruments**

Volatility of interest rates, exchange rates and commodity prices are the main market risks to which we are exposed all three are managed through derivative operations. These have the exclusive aim of reducing exposure to risk. We do not use derivatives for speculation purposes.

We monitor and evaluate our derivative positions on a regular basis and adjust our strategy in response to market conditions. We also periodically review the credit limits and credit worthiness of our counter-parties in these transactions. In view of the policies and practices established for operations with derivatives, management considers the occurrence of non-measurable risk situations as unlikely.

The asset (liability) balances and the movement in fair value of derivative financial instruments is as follows (the quarterly information is unaudited):

	Gold	Interest rates (LIBOR)	Currencies	Alumina	Aluminum	Total
Unrealized gains (losses) at January 1, 2004	(32)	(46)	5	(18)		(91)
Initial consolidation of Albras					(20)	(20)
Financial settlement		3	(2)			1
Unrealized gains (losses) in the period	(5)	(6)	(2)	(18)	(23)	(54)
Effect of exchange rate changes		1				1
	(37)	(48)	1	(36)	(43)	(163)
Unrealized gains (losses) at March 31, 2004	(37)	(48)	1	(36)	(43)	(163)
Unrealized gains (losses) at January 1, 2003	(15)	(60)	(1)	3		(73)
Financial settlement		4				4
Unrealized gains (losses) in the period	5	(8)				(3)
Effect of exchange rate changes		(4)				(4)
	(10)	(68)	(1)	3		(76)
Unrealized gains (losses) at March 31, 2003	(10)	(68)	(1)	3		(76)
Unrealized gains (losses) at October 1, 2003	(22)	(60)	2	(5)		(85)
Financial settlement	3	12				15
Unrealized gains (losses) in the period	(12)	2	3	(13)		(20)
Effect of exchange rate changes	(1)					(1)

Unrealized gains (losses) at December 31, 2003	(32)	(46)	5	(18)	—	(91)
	—	—	—	—	—	—

Unrealized gains (losses) in the period are included in our income statement under the following caption of financial expenses:

Final maturity dates for the above instruments are as follows:

Gold	Dec 2008
Interest rates (LIBOR)	Oct 2007
Currencies	Dec 2011
Alumina	Dec 2008
Aluminum	Dec 2006

Table of Contents

(a) Interest Rate and Exchange Rate Risk

Interest rate risks mainly relate to that part of the foreign debt borrowed at floating rates. The foreign currency debt is largely subject to fluctuations in the London Interbank Offered Rate – LIBOR. That portion of local currency denominated debt that is subject to floating rates is linked to the Long Term Interest Rate – TJLP, fixed quarterly by the Brazilian Central Bank. We have used derivative instruments to protect ourselves against fluctuations in the LIBOR rate.

There is an exchange rate risk associated with our foreign currency denominated debt. On the other hand, the majority of our revenues is denominated in, or automatically indexed to, the U.S. dollar, while the majority of our costs is denominated in reais. This provides a natural hedge against any devaluation of the Brazilian real against the U.S. dollar. When events of this nature occur, the immediate negative impact on foreign currency denominated debt is offset over time by the positive effect of devaluation on future cash flows.

With the floating exchange rate regime in Brazil, we adopt a strategy of monitoring market fluctuations, using derivatives to protect against specific risks from exchange rate variation.

From time to time we enter into foreign exchange derivative swap transactions seeking to change the characteristics of our real-denominated cash investments to US dollar-indexed instruments. The extent of such transactions depends on our perception of market and currency risk, but is never speculative in nature. All such operations are marked-to-market at each balance sheet date and the effect included in financial income or expense. During the periods presented our use of such instruments was not significant.

(b) Commodity Price Risk

We also use derivative instruments to manage exposure to changing gold prices and to ensure an average minimum profit level for future and alumina production. However, they may also have the effect of eliminating potential gains on certain price increases in the spot market. We manage our contract positions actively, and the results are reviewed at least monthly, allowing adjustments to targets and strategy to be made in response to changing market conditions.

In the case of gold and alumina derivatives, our policy has been to settle all contracts through cash payments or receipts, without physical delivery of product.

13 Subsequent Event

On April 1, 2004, we obtained a syndicated loan in the amount of \$ 300 million. The loan has a term of seven years and bears interest at 6-month LIBOR plus 0.7% per annum.
