CVRD acquires 45.5% of Valesul

Rio de Janeiro, July 3, 2006 Companhia Vale do Rio Doce (CVRD) informs that it acquired 45.5% of Valesul Alumínio S.A. (Valesul), an aluminum smelter located in the state of Rio de Janeiro, Brazil, for US\$27.5 million. Pursuant to Valesul's shareholders' agreement, CVRD exercised its right of first refusal and bought the stake of its partner, BHP Billiton Metais. As a result of this acquisition, it owns now 100% of Valesul. Hence, CVRD will start consolidating Valesul under US GAAP (general accepted accounting principles in the United States of America) financial reporting in the third quarter this year.

Valesul has a nominal capacity of 95,000 tons per year of primary aluminum and aluminum alloys in the form of ingots and billets. The company also recycles aluminum scrap for clients, with a nominal capacity of 25,000 tons per year.

In the first quarter of 2006, Valesul had net revenues of US\$58 million and EBITDA (earnings before interest, taxes, depreciation and amortization) of US\$8 million. Valesul had gross debt equal to zero as of March 31, 2006.

Valesul supplies 40% of its annual power consumption, which is generated by four wholly owned small hydroelectric power plants and a take related to its stake in Machadinho hydroelectric power plant, located in the Pelotas river, in the state of Santa Catarina, Brazil.

The acquisition of Valesul is aligned with CVRD's strategy for the aluminum business of focusing on organic growth in the upstream of the value chain and strategic partnership in smelters.

This press release may contain statements that express management's expectations about future events or results rather than historical facts. These forward-looking statements involve risks and uncertainties that could cause actual results to differ materially from those projected in forward-looking statements, and CVRD cannot give assurance that such statements will prove correct. These risks and uncertainties include factors: relating to the Brazilian economy and securities markets, which exhibit volatility and can be adversely affected by developments in other countries; relating to the iron ore business and its dependence on the global steel industry, which is cyclical in nature; and relating to the highly competitive industries in which CVRD operates. For additional information on factors that could cause CVRD's actual results to differ from expectations reflected in forward-looking statements, please see CVRD's reports filed with the Brazilian Comissão de Valores Mobiliários and the U.S. Securities and Exchange Commission.
