INVESTMENT ADVISER NAME CHANGE

Effective January 1, 2011, Nuveen Asset Management, the Funds investment adviser, changed its name to Nuveen Fund Advisors, Inc. (*Nuveen Fund Advisors*). Concurrently, Nuveen Fund Advisors formed a wholly-owned subsidiary, Nuveen Asset Management, LLC, to house its portfolio management capabilities.

NUVEEN INVESTMENTS COMPLETES STRATEGIC COMBINATION WITH FAF ADVISORS

On December 31, 2010, Nuveen Investments completed the strategic combination between Nuveen Asset Management, LLC, the largest investment affiliate of Nuveen Investments, and FAF Advisors. As part of this transaction, U.S. Bancorp the parent of FAF Advisors received cash consideration and a 9.5% stake in Nuveen Investments in exchange for the long term investment business of FAF Advisors, including investment-management responsibilities for the non-money market mutual funds of the First American Funds family.

The approximately \$27 billion of mutual fund and institutional assets managed by FAF Advisors, along with the investment professionals managing these assets and other key personnel, have become part of Nuveen Asset Management, LLC. With these additions to Nuveen Asset Management, LLC, this affiliate now manages more than \$100 billion of assets across a broad range of strategies from municipal and taxable fixed income to traditional and specialized equity investments.

This combination does not affect the investment objectives or strategies of the Funds in this report. Over time, Nuveen Investments expects that the combination will provide even more ways to meet the needs of investors who work with financial advisors and consultants by enhancing the multi-boutique model of Nuveen Investments, which also includes highly respected investment teams at HydePark, NWQ Investment Management, Santa Barbara Asset Management, Symphony Asset Management, Tradewinds Global Investors and Winslow Capital. Nuveen Investments managed approximately \$197 billion of assets as of December 31, 2010.

Chairman s Letter to Shareholders

Dear Shareholders,

In 2010, the global economy recorded another year of recovery from the financial and economic crises of 2008, but many of the factors that caused the downturn still weigh on the prospects for continued improvement. In the U.S., ongoing weakness in housing values has put pressure on homeowners and mortgage lenders. Similarly, the strong earnings recovery for corporations and banks is only slowly being translated into increased hiring or more active lending. Globally, deleveraging by private and public borrowers has inhibited economic growth and that process is far from complete.

Encouragingly, constructive actions are being taken by governments around the world to deal with economic issues. In the U.S., the recent passage of a stimulatory tax bill relieved some of the pressure on the Federal Reserve to promote economic expansion through quantitative easing and offers the promise of sustained economic growth. A number of European governments are undertaking programs that could significantly reduce their budget deficits. Governments across the emerging markets are implementing various steps to deal with global capital flows without undermining international trade and investment.

The success of these government actions could determine whether 2011 brings further economic recovery and financial market progress. One risk associated with the extraordinary efforts to strengthen U.S. economic growth is that the debt of the U.S. government will continue to grow to unprecedented levels. Another risk is that over time there could be inflationary pressures on asset values in the U.S. and abroad, because what happens in the U.S. impacts the rest of the world economy. Also, these various actions are being taken in a setting of heightened global economic uncertainty, primarily about the supplies of energy and other critical commodities. In this challenging environment, your Nuveen investment team continues to seek sustainable investment opportunities and to remain alert to potential risks in a recovery still facing many headwinds. On your behalf, we monitor their activities to assure they maintain their investment disciplines.

As you will note elsewhere in this report, on December 31, 2010, Nuveen Investments completed a strategic combination with FAF Advisors, Inc., the manager of the First American Funds. The combination adds highly respected and distinct investment teams to meet the needs of investors and their advisors and is designed to benefit all fund shareholders by creating a fund organization with the potential for further economies of scale and the ability to draw from even greater talent and expertise to meet those investor needs.

As always, I encourage you to contact your financial consultant if you have any questions about your investment in a Nuveen Fund. On behalf of the other members of your Fund Board, we look forward to continuing to earn your trust in the months and years ahead.

Sincerely, Robert P. Bremner Chairman of the Board March 24, 2011

Portfolio Manager s Comments

Nuveen Senior Income Fund (NSL) Nuveen Floating Rate Income Fund (JFR) Nuveen Floating Rate Income Opportunity Fund (JRO)

The Funds investment portfolios have been managed since 2001 by Gunther Stein of Symphony Asset Management LLC, an affiliate of Nuveen Investments, Inc. Gunther, who is Symphony s Chief Investment Officer, has more than 20 years of investment management experience, much of it in evaluating and purchasing senior corporate loans and other high yield debt.

Here Gunther talks about his management strategies and the performance of the Funds for the six-month period ended January 31, 2011.

What key strategies were used to manage the Fund during the six-month period ended January 31, 2011?

Certain statements in this report are forward-looking statements. Discussions of specific investments are for illustration only and are not intended as recommendations of individual investments. The forward-looking statements and other views expressed herein are those of the portfolio manager as of the date of this report. Actual future results or occurrences may differ significantly from those anticipated in any forward-looking statements and the views expressed herein are subject to change at any time, due to numerous market and other factors. The Funds disclaim any obligation to update publicly or revise any forward-looking statements or views expressed herein.

Any reference to credit ratings for portfolio holdings denotes the highest rating assigned by a Nationally Recognized Statistical Rating Organization (NRSRO) such as Standard & Poor s, Moody s or Fitch. AAA, AA, A and BBB ratings are investment grade; BB, B, CCC, CC, C and D ratings are below investment grade. Holdings and ratings may change over time.

The investment objective of each Fund is to achieve a high level of current income by investing primarily in adjustable rate secured and unsecured senior loans and other debt instruments. Other investments may include U.S. dollar denominated senior loans of non-U.S. borrowers and equity securities and warrants acquired in connection with the Fund s investment in senior loans.

The six-month period ended January 31, 2011, saw continued asset price recovery in the corporate credit markets from depressed 2009 levels, driven by an improving fundamental and technical environment. The senior loan market represented an attractive asset class during the period, driven by a strong risk-return relationship featuring both interest income and principal appreciation from the secured position in the capital structure. Further, a recovering primary market generated significant new loan activity during the period, allowing companies to refinance debt and extend loan maturities while offering investors attractive terms.

Fundamentals over the period were positive, demonstrated by a significant decline in defaults and decreased corporate leverage with improved corporate earnings. For example, leveraged loans finished 2010 at a 2.58% default rate, according to Credit Suisse, compared with 2009 defaults of 9.58%. Similarly, high yield bonds experienced a

significant improving default environment finishing 2010 with defaults of 1.51% compared to 2009 defaults of 9.36% according to Credit Suisse. An improving leveraged loan and high yield primary market enabled companies to refinance deals and extend maturities.

The strong supply and demand dynamic in the market was driven by significant interest in senior loans. As an example, inflows into loan mutual funds were \$12.3 billion for 2010, according to Lipper, a near four-fold increase from 2009 inflows. On the supply-side, new issues for senior loans were \$183.2 billion for 2010, according to Credit Suisse, a

significant increase from the \$56.3 million of new deals in 2009, but below the \$226.0 billion average for the last five years.

The consensus of market participants implies that technicals will remain firm in the short term, as new issue volume will be outweighed by investor demand for loans. This demand is coming from both investors looking to take on credit risk, as well as investors who want to swap into floating rate income given the steepness in the yield curve. In terms of fundamentals, we remain optimistic in the near term as earnings are improved on average, however we are monitoring longer-term implications of rising commodity costs on the economy. We feel that active managers who understand the companies in which they invest will outperform the market, as technical and fundamental catalysts provide for opportunistic investment in (and avoidance of) specific loans.

How did the Fund perform over this six-month period?

The performance of the Funds, as well as the returns of comparative market indexes, is presented in the accompanying table.

Average Annual Total Returns on Common Share Net Asset Value

For periods ended 1/31/11

	6-Month	1-Year	5-Year	10-Year
NSL	10.26%	15.18%	5.40%	6.19%
JFR	10.06%	14.31%	4.82%	N/A
JRO	10.96%	15.34%	5.52%	N/A
CSFB Leveraged Loan Index ¹	7.06%	10.13%	4.69%	4.93%
Barclays Capital U.S. Aggregate Bond Index ²	0.20%	5.06%	5.82%	5.68%

Past performance is not predictive of future results. Current performance may be higher or lower than the data shown. Returns do not reflect the deduction of taxes that shareholders may have to pay on Fund distributions or upon the sale of Fund shares.

For additional information, see the individual Performance Overview for your Fund in this report.

- 1 The CSFB Leveraged Loan Index is a representative, unmanaged index of tradeable, senior, U.S. dollar-denominated leveraged loans. Index returns do not include the effects of any sales charges or management fees. It is not possible to invest directly in an index.
- 2 The Barclays Capital U.S. Aggregate Bond Index is an unmanaged index that includes all investment-grade, publicly issued, fixed-rate, dollar denominated, nonconvertible debt issues and commercial mortgage backed securities with maturities of at least one year and outstanding par values of \$150 million or more. Index returns do not include the effects of any sales charges or management fees. It is not possible to invest directly in an index.

Six-month returns are cumulative; all other returns are annualized.

For the six-month period ending January 31, 2011, all three Funds outperformed the comparative indexes. The senior loan market performance during the period was driven by continued appreciation of lower-rated and higher leveraged loans. Despite a focus on higher quality names, some of the lower-dollar priced assets in each Fund s portfolio drove

performance for the period. Examples included Univision Communications and U.S. Foodservice, whose loan securities continued to appreciate during the period from stressed price levels stemming from their highly levered balance sheets after their respective leveraged buyouts in 2007. We felt that both businesses offered sufficient downside protection due to their asset quality and business valuation. These assets provided an attractive total return opportunity in the senior loan asset class where returns are historically driven by coupon.

A continued trend during the six-month period was the high level of refinancing in the corporate credit market, specifically the use of high yield bond issuance to refinance senior loans. This trend has enabled companies to extend debt maturities (with typically longer maturity and fixed funding high yield bonds) and provide a runway for the business cycle to improve and leverage to decrease over time. This dynamic continued to be a positive technical factor as it removed supply from the senior loan market. Further, the 2012-2014 loan maturity wall was below \$290 billion at the end of 2010, according to Barclays, compared with \$405 billion at the end of 2009, demonstrating loan issuers ability to

refinance and repay their debt maturities within the confines of the corporate credit markets.

IMPACT OF THE FUNDS LEVERAGE STRATEGY ON PERFORMANCE

One important factor impacting the return of the Funds relative to the comparative indexes was the Funds use of financial leverage through the use of bank borrowings. The Funds use leverage because their managers believe that, over time, leveraging provides opportunities for additional income and total return for common shareholders. However, use of leverage also can expose common shareholders to additional volatility. For example, as the prices of securities held by a Fund decline, the negative impact of these valuation changes on common share net asset value and common shareholder total return is magnified by the use of leverage. Conversely, leverage may enhance common share returns during periods when the prices of securities held by a Fund generally are rising. Leverage made a positive contribution to the performance of the Funds over this reporting period.

RECENT EVENTS CONCERNING THE FUNDS REDEMPTION OF AUCTION RATE PREFERRED SHARES

Shortly after their inceptions, the Funds issued auction rate preferred shares (ARPS) to create financial leverage. As noted in past shareholder reports, the weekly auctions for those ARPS began in February 2008 to consistently fail, causing the Funds to pay the so-called maximum rate to ARPS shareholders under the terms of the ARPS in the Funds charter documents. The Funds redeemed their ARPS at par in 2009 and since then have relied upon bank borrowings to create financial leverage.

During 2010, certain Nuveen leveraged closed-end funds (including JRO) received a demand letter from a law firm on behalf of purported holders of common shares of each such fund, alleging that Nuveen and the funds—officers and Board of Directors/Trustees breached their fiduciary duties related to the redemption at par of the funds—ARPS. In response, the Board established an ad hoc Demand Committee consisting of certain of its disinterested and independent Board members to investigate the claims. The Demand Committee retained independent counsel to assist it in conducting an extensive investigation. Based upon its investigation, the Demand Committee found that it was not in the best interests of each fund or its shareholders to take the actions suggested in the demand letters, and recommended that the full Board reject the demands made in the demand letters. After reviewing the findings and recommendation of the Demand Committee, the full Board of each fund unanimously adopted the Demand Committee s recommendation.

Subsequently, the funds that received demand letters (excluding JRO) were named in a consolidated complaint as nominal defendants in a putative shareholder derivative action captioned *Martin Safier*, *et al. v. Nuveen Asset Management*, *et al.* that was filed in the Circuit Court of Cook County, Illinois, Chancery Division (the Cook County Chancery Court) on February 18, 2011 (the Complaint). The Complaint, filed on behalf of purported holders of each fund s common shares, also name Nuveen Asset Management as a defendant, together with current and former Officers and interested Director/Trustees of each of the funds (together with the nominal defendants, collectively, the

Defendants). The Complaint contains the same basic allegations contained in the demand letters. The suits seek a declaration that the Defendants have breached their fiduciary duties, an order directing the Defendants not to redeem any ARPS at their liquidation value using fund assets, indeterminate monetary damages in favor of the funds and an award of plaintiffs costs and disbursements in pursuing the action. Nuveen Asset Management believes that the Complaint is without merit, and is defending vigorously against these charges.

Common Share Distribution and Share Price Information

As noted earlier, these Funds use financial leverage to potentially enhance opportunities for additional income for common shareholders. The Funds—use of this leverage strategy continued to provide incremental income, although the extent of this benefit was reduced to some degree by short-term interest rates that remained relatively high during the early part of the period. This, in turn, kept the Funds—borrowing costs high. NSL increased its distribution once while JFR and JRO increased their distributions twice over the six-month period.

During certain periods, each Fund may pay dividends at a rate that may be more or less than the amount of net investment income actually earned by the Fund during the period. If a Fund has cumulatively earned more than it has paid in dividends, it holds the excess in reserve as undistributed net investment income (UNII) as part of the Fund s common share NAV. Conversely, if a Fund has cumulatively paid dividends in excess of its earnings, the excess constitutes negative UNII that is likewise reflected in the Fund s common share NAV. As of January 31, 2011, all three Funds had positive UNII balances, based on our best estimates, for tax purposes and positive UNII balances for financial reporting purposes.

COMMON SHARE REPURCHASES

As of January 31, 2011, and since the inception of the Funds repurchase program, JFR and JRO have cumulatively repurchased and retired their common shares as shown in the accompanying table. Since the inception of the Funds repurchase program, NSL has not repurchased any of its outstanding common shares.

	Common Shares	% of Outstanding
Fund	Repurchased and Retired	Common Shares
JFR	147,593	0.3%
JRO	19,400	0.1%

During the six-month reporting period, JFR and JRO did not repurchase any of their outstanding common shares.

SHELF EQUITY PROGRAMS

During the six-month reporting period, NSL, JFR and JRO filed registration statements with the Securities and Exchange Commission (SEC) authorizing the Funds to issue 2.9 million, 4.7 million and 2.8 million common shares, respectively, through a shelf offering. Under these equity shelf programs, the Funds, subject to market conditions, may raise additional capital from time to time in varying amounts and offering methods at a net price at or above each Fund s NAV per common share.

As of January 31, 2011, NSL and JRO had cumulatively sold 1,072,309 and 925,494 common shares, respectively, through their shelf equity programs. JFR has not sold any common shares through its shelf equity program.

During the six-month reporting period, NSL and JRO sold common shares through their shelf equity programs at an average premium to NAV per common share as shown in the accompanying table.

	Common Shares	
	Sold through	Premium to NAV
Fund	Shelf Offering	per Share Sold
NSL	1,072,309	3.23%
JRO	925,494	3.10%

For Fund portfolio compliance purposes, the Fund s industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or ratings group indexes, and/or as defined by Fund management. This definition may not apply for purposes of this report, which may combine industry sub-classifications into sectors for reporting ease.

- (1) All percentages shown in the Portfolio of Investments are based on net assets applicable to Common shares unless otherwise noted.
- (2) Senior Loans generally are subject to mandatory and/or optional prepayment. Because of these mandatory prepayment conditions and because there may be significant economic incentives for a Borrower to prepay, prepayments of Senior Loans may occur. As a result, the actual remaining maturity of Senior Loans held may be substantially less than the stated maturities shown.
- (3) Ratings: Using the highest of Standard & Poor s Group (Standard & Poor s), Moody s Investor Service, Inc. (Moody s) or Fitch, Inc. (Fitch) rating. Ratings below BBB by Standard & Poor s, Baa by Moody s or BBB by Fitch are considered to be below investment grade. Holdings designated N/R are not rated by any of these national rating agencies.
- (4) Senior Loans generally pay interest at rates which are periodically adjusted by reference to a base short-term, floating lending rate plus an assigned fixed rate. These floating lending rates are generally (i) the lending rate referenced by the London Inter-Bank Offered Rate (LIBOR), or (ii) the prime rate offered by one or more major United States banks.
 - Senior Loans may be considered restricted in that the Fund ordinarily is contractually obligated to receive approval from the Agent Bank and/or Borrower prior to the disposition of a Senior Loan.
- (5) Non-income producing; denotes that the issuer has defaulted on the payment of principal or interest or has filed for bankruptcy.
- (6) At or subsequent to January 31, 2011, this issue was under the protection of the Federal Bankruptcy Court or has filed for bankruptcy.
- (7) The Fund s Adviser has concluded this issue is not likely to meet its future interest payment obligations and has directed the Fund s custodian to cease accruing additional income and write-off any remaining recorded balances on the Fund s records.
- (8) Non-income producing; issuer has not declared a dividend within the past twelve months.
- (9) For fair value measurement disclosure purposes, Common Stock categorized as Level 2. See Notes to Financial Statements, Footnote 1 General Information and Significant Accounting Policies, Investment Valuation for more information.
- (10) The Fund s Adviser has concluded this issue is not likely to meet its future interest payment obligations and has directed the Fund s custodian to cease accruing additional income on the Fund s records.
- (11) Non-income producing security, in the case of a bond, generally denotes that the issuer has defaulted on the payment of principal or interest or has filed for bankruptcy.
- (12) Borrowings as a percentage of Total Investments is 24.4%.
- (13) The Fund may pledge up to 100% of its eligible investments in the Portfolio of Investments as collateral for Borrowings.
- N/R Not rated.
- DD1 Investment, or portion of investment, purchased on a delayed delivery basis.
- WI/DD Purchased on a when-issued or delayed delivery basis.

144A

Investment is exempt from registration under Rule 144A of the Securities Act of 1933, as amended. These investments may only be resold in transactions exempt from registration, which are normally those transactions with qualified institutional buyers.

TBD Senior Loan purchased on a when-issued or delayed-delivery basis. Certain details associated with this purchase are not known prior to the settlement date of the transaction. In addition, Senior Loans typically trade without accrued interest and therefore a weighted average coupon rate is not available prior to settlement. At settlement, if still unknown, the Borrower or counterparty will provide the Fund with the final weighted average coupon rate and maturity date.

See accompanying notes to financial statements.

For Fund portfolio compliance purposes, the Fund s industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or ratings group indexes, and/or as defined by Fund management. This definition may not apply for purposes of this report, which may combine industry sub-classifications into sectors for reporting ease.

- (1) All percentages shown in the Portfolio of Investments are based on net assets applicable to Common shares unless otherwise noted.
- (2) Senior Loans generally are subject to mandatory and/or optional prepayment. Because of these mandatory prepayment conditions and because there may be significant economic incentives for a Borrower to prepay, prepayments of Senior Loans may occur. As a result, the actual remaining maturity of Senior Loans held may be substantially less than the stated maturities shown.
- (3) Ratings: Using the highest of Standard & Poor s Group (Standard & Poor s), Moody s Investor Service, Inc. (Moody s) or Fitch, Inc. (Fitch) rating. Ratings below BBB by Standard & Poor s, Baa by Moody s or BBB by Fitch are considered to be below investment grade. Holdings designated N/R are not rated by any of these national rating agencies.

- (4) Senior Loans generally pay interest at rates which are periodically adjusted by reference to a base short-term, floating lending rate plus an assigned fixed rate. These floating lending rates are generally (i) the lending rate referenced by the London Inter-Bank Offered Rate (LIBOR), or (ii) the prime rate offered by one or more major United States banks.
 - Senior Loans may be considered restricted in that the Fund ordinarily is contractually obligated to receive approval from the Agent Bank and/or Borrower prior to the disposition of a Senior Loan.
- (5) Non-income producing; denotes that the issuer has defaulted on the payment of principal or interest or has filed for bankruptcy.
- (6) At or subsequent to January 31, 2011, this issue was under the protection of the Federal Bankruptcy Court or has filed for bankruptcy.
- (7) The Fund's Adviser has concluded this issue is not likely to meet its future interest payment obligations and has directed the Fund's custodian to cease accruing additional income and write-off any remaining recorded balances on the Fund's records.
- (8) Non-income producing; issuer has not declared a dividend within the past twelve months.
- (9) For fair value measurement disclosure purposes, Common Stock categorized as Level 2. See Notes to Financial Statements, Footnote 1 General Information and Significant Accounting Policies, Investment Valuation for more information.
- (10) The Fund s Adviser has concluded this issue is not likely to meet its future interest payment obligations and has directed the Fund s custodian to cease accruing additional income on the Fund s records.
- (11) Non-income producing security, in the case of a bond, generally denotes that the issuer has defaulted on the payment of principal or interest or has filed for bankruptcy.
- (12) Borrowings as a percentage of Total Investments is 24.6%.
- (13) The Fund may pledge up to 100% of its eligible investments in the Portfolio of Investments as collateral for Borrowings.
- N/R Not rated.
- DD1 Investment, or portion of investment, purchased on a delayed delivery basis.
- WI/DD Purchased on a when-issued or delayed delivery basis.
 - 144A Investment is exempt from registration under Rule 144A of the Securities Act of 1933, as amended. These investments may only be resold in transactions exempt from registration, which are normally those transactions with qualified institutional buyers.
 - TBD Senior Loan purchased on a when-issued or delayed-delivery basis. Certain details associated with this purchase are not known prior to the settlement date of the transaction. In addition, Senior Loans typically trade without accrued interest and therefore a weighted average coupon rate is not available prior to settlement. At settlement, if still unknown, the Borrower or counterparty will provide the Fund with the final weighted average coupon rate and maturity date.

See accompanying notes to financial statements.

For Fund portfolio compliance purposes, the Fund s industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or ratings group indexes, and/or as defined by Fund management. This definition may not apply for purposes of this report, which may combine industry sub-classifications into sectors for reporting ease.

- (1) All percentages shown in the Portfolio of Investments are based on net assets applicable to Common shares unless otherwise noted.
- (2) Senior Loans generally are subject to mandatory and/or optional prepayment. Because of these mandatory prepayment conditions and because there may be significant economic incentives for a Borrower to prepay, prepayments of Senior Loans may occur. As a result, the actual remaining maturity of Senior Loans held may be substantially less than the stated maturities shown.
- (3) Ratings: Using the highest of Standard & Poor s Group (Standard & Poor s), Moody s Investor Service, Inc. (Moody s) or Fitch, Inc. (Fitch) rating. Ratings below BBB by Standard & Poor s, Baa by Moody s or BBB by Fitch are considered to be below investment grade. Holdings designated N/R are not rated by any of these national rating agencies.
- (4) Senior Loans generally pay interest at rates which are periodically adjusted by reference to a base short-term, floating lending rate plus an assigned fixed rate. These floating lending rates are generally (i) the lending rate referenced by the London Inter-Bank Offered Rate (LIBOR), or (ii) the prime rate offered by one or more major United States banks.
 - Senior Loans may be considered restricted in that the Fund ordinarily is contractually obligated to receive approval from the Agent Bank and/or Borrower prior to the disposition of a Senior Loan.
- (5) Non-income producing; denotes that the issuer has defaulted on the payment of principal or interest or has filed for bankruptcy.
- (6) At or subsequent to January 31, 2011, this issue was under the protection of the Federal Bankruptcy Court or has filed for bankruptcy.
- (7) The Fund s Adviser has concluded this issue is not likely to meet its future interest payment obligations and has directed the Fund s custodian to cease accruing additional income and write-off any remaining recorded balances on the Fund s records.
- (8) Non-income producing; issuer has not declared a dividend within the past twelve months.
- (9) For fair value measurement disclosure purposes, Common Stock categorized as Level 2. See Notes to Financial Statements, Footnote 1 General Information and Significant Accounting Policies, Investment Valuation for more information.
- (10) The Fund s Adviser has concluded this issue is not likely to meet its future interest payment obligations and has directed the Fund s custodian to cease accruing additional income on the Fund s records.
- (11) Non-income producing security, in the case of a bond, generally denotes that the issuer has defaulted on the payment of principal or interest or has filed for bankruptcy.
- (12) Borrowings as a percentage of Total Investments is 24.9%.
- (13) The Fund may pledge up to 100% of its eligible investments in the Portfolio of Investments as collateral for Borrowings.
- N/R Not rated.
- DD1 Investment, or portion of investment, purchased on a delayed delivery basis.
- WI/DD Purchased on a when-issued or delayed delivery basis.

144A

Investment is exempt from registration under Rule 144A of the Securities Act of 1933, as amended. These investments may only be resold in transactions exempt from registration, which are normally those transactions with qualified institutional buyers.

TBD Senior Loan purchased on a when-issued or delayed-delivery basis. Certain details associated with this purchase are not known prior to the settlement date of the transaction. In addition, Senior Loans typically trade without accrued interest and therefore a weighted average coupon rate is not available prior to settlement. At settlement, if still unknown, the Borrower or counterparty will provide the Fund with the final weighted average coupon rate and maturity date.

See accompanying notes to financial statements.

- (a) Per share Net Investment Income is calculated using the average daily shares method.
- (b) The amounts shown are based on Common share equivalents.
- (c) Total Return Based on Market Value is the combination of changes in the market price per share and the effect of reinvested dividend income and reinvested capital gains distributions, if any, at the average price paid per share at the time of reinvestment. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending market price. The actual reinvestment for the last dividend declared in the period may take place over several days, and in some instances may not be based on the market price, so the actual reinvestment price may be different from the price used in the calculation. Total returns are not annualized.

Total Return Based on Common Share Net Asset Value is the combination of changes in Common share net asset value, reinvested dividend income at net asset value and reinvested capital gains distributions at net asset value, if any. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending net asset value. The actual reinvest price for the last dividend declared in the period may often be based on the Fund s market price (and not its net asset value), and therefore may be different from the price used in the calculation. Total returns are not annualized.

(d) Ratios do not reflect the effect of dividend payments to Preferred shareholders, where applicable. Net Investment Income ratios reflect income earned and expenses incurred on assets attributable to Preferred shares and/or borrowings, where applicable.

Each ratio includes the effect of the interest expense paid on borrowings as follows:

Notes to Financial Statements (Unaudited)

1. General Information and Significant Accounting Policies

General Information

The funds covered in this report and their corresponding Common share New York Stock Exchange (NYSE) symbols are Nuveen Senior Income Fund (NSL), Nuveen Floating Rate Income Fund (JFR) and Nuveen Floating Rate Income Opportunity Fund (JRO) (collectively, the Funds). The Funds are registered under the Investment Company Act of 1940, as amended, as closed-end management investment companies.

Effective January 1, 2011, the Funds adviser Nuveen Asset Management, a wholly-owned subsidiary of Nuveen Investments, Inc. (Nuveen) has charged its name to Nuveen Fund Advisors, Inc. (the Adviser).

Senior Income s (NSL) investment objective is to achieve a high level of current income, consistent with capital preservation. The Fund invests 80% of its total assets in adjustable rate senior secured loans. The Fund may invest up to 20% of its total assets in U.S. dollar- denominated senior loans of non-U.S. borrowers, senior loans that are not secured, other debt securities, and equity securities and warrants acquired in connection with the Fund s investment in senior loans.

Floating Rate Income s (JFR) investment objective is to achieve a high level of current income. The Fund invests at least 65% of its managed assets in adjustable rate senior loans that are secured by specific collateral. The Fund may invest a substantial portion of its managed assets in senior loans and other debt instruments that are, at the time of investment, rated below investment grade or are unrated but judged to be of comparable quality by the Fund s sub-adviser Symphony Asset Management LLC (Symphony), a subsidiary of Nuveen.

Floating Rate Income Opportunity s (JRO) investment objective is to achieve a high level of current income. The Fund invests at least 80% of its managed assets in adjustable rate loans, primarily secured senior loans. As part of the 80% requirement, the Fund also may invest in unsecured senior loans and secured and unsecured subordinated loans. The Fund invests at least 65% of its managed assets in adjustable rate senior loans that are secured by specific collateral.

The following is a summary of significant accounting policies followed by the Funds in the preparation of their financial statements in accordance with U.S. generally accepted accounting principles (U.S. GAAP).

Significant Accounting Policies

Investment Valuation

Common stocks and other equity-type securities are valued at the last sales price on the securities exchange on which such securities are primarily traded and are generally classified as Level 1. Securities primarily traded on the NASDAQ National Market (NASDAQ) are valued, except as indicated below, at the NASDAQ Official Closing Price and are generally classified as Level 1. However, securities traded on a securities exchange or NASDAQ for which there were no transactions on a given day or securities not listed on a securities exchange or NASDAQ are valued at the mean between the quoted bid and ask prices and are generally classified as Level 1. Investments in investment

companies are valued at their respective net asset values on the valuation date. These investment vehicles are generally classified as Level 1.

Prices of fixed-income securities and senior loans are provided by a pricing service approved by the Funds Board of Trustees. Floating Rate Income Opportunity (JRO) currently expects that the independent pricing services will be unable to provide a market based price for certain of the privately negotiated subordinated loans issued by middle market companies. The pricing services, with input from Symphony and the Adviser will estimate the fair value for such subordinated loans, subject to the supervision of Symphony and the Adviser. Floating Rate Income Opportunity (JRO) may engage an independent appraiser to periodically provide an independent determination of the value, or an opinion with respect to the pricing services—value, of such loans. These securities are generally classified as Level 2. Prices of fixed-income securities are based on the mean between the bid and asked prices. When price quotes are not readily available the pricing service establishes a security—s fair value using methods that may include consideration of the following: yields or prices of investments of comparable quality, type of issue, coupon, maturity and rating, market quotes or indications of value from security dealers, evaluations of anticipated cash flows or collateral, general market conditions and other information and analysis, including the obligor—s credit characteristics considered relevant. In pricing certain securities, particularly less liquid and lower quality securities, the pricing service may consider information about a security, its issuer, or market activity, provided by the Adviser. These securities are generally classified as Level 2 or

12	NT	T
42	Nuveen	Investments

Level 3 depending on the priority of the significant inputs. Highly rated zero coupon fixed-income securities, like U.S. Treasury Bills, issued with maturities of one year or less, are valued using the amortized cost method when 60 days or less remain until maturity. With amortized cost, any discount or premium is amortized each day, regardless of the impact of fluctuating rates on the market value of the security. These securities are generally classified as Level 2.

Like most fixed income instruments, the senior loans in which the Funds invest are not listed on an organized exchange. The secondary market of senior loans may be less liquid relative to markets for other fixed-income securities. Consequently, the value of senior loans, determined as described above, may differ significantly from the value that would have been determined had there been an active market for that senior loan. These securities are generally classified as Level 2.

Repurchase agreements are valued at contract amount plus accrued interest, which approximates market value. These securities are generally classified as Level 2.

Certain securities may not be able to be priced by the pre-established pricing methods as described above. Such securities may be valued by the Funds Board of Trustees or its designee at fair value. These securities generally include, but are not limited to, restricted securities (securities which may not be publicly sold without registration under the Securities Act of 1933, as amended) for which a pricing service is unable to provide a market price; securities whose trading has been formally suspended; debt securities that have gone into default and for which there is no current market quotation; a security whose market price is not available from a pre-established pricing source; a security with respect to which an event has occurred that is likely to materially affect the value of the security after the market has closed but before the calculation of a Fund s net asset value (as may be the case in non-U.S. markets on which the security is primarily traded) or make it difficult or impossible to obtain a reliable market quotation; and a security whose price, as provided by the pricing service, is not deemed to reflect the security s fair value. As a general principle, the fair value of a security would appear to be the amount that the owner might reasonably expect to receive for it in a current sale. A variety of factors may be considered in determining the fair value of such securities, which may include consideration of the following: yields or prices of investments of comparable quality, type of issue, coupon, maturity and rating, market quotes or indications of value from security dealers, evaluations of anticipated cash flows or collateral, general market conditions and other information and analysis, including the obligor s credit characteristics considered relevant. These securities are generally classified as Level 2 or Level 3 depending on the priority of the significant inputs. Regardless of the method employed to value a particular security, all valuations are subject to review by the Funds Board of Trustees or its designee.

Refer to Footnote 2 Fair Value Measurements for further details on the leveling of securities held by the Funds as of the end of the reporting period.

Investment Transactions

Investment transactions are recorded on a trade date basis. Trade date for senior and subordinated loans purchased in the primary market is considered the date on which the loan allocations are determined. Trade date for senior and subordinated loans purchased in the secondary market is the date on which the transaction is entered into. Realized gains and losses from investment transactions are determined on the specific identification method, which is the same basis used for federal income tax purposes. Investments purchased on a when-issued/delayed delivery basis may have extended settlement periods. Any investments so purchased are subject to market fluctuation during this period. The Funds have instructed the custodian to segregate assets with a current value at least equal to the amount of the when-issued/delayed delivery purchase commitments. At January 31, 2011, Senior Income (NSL), Floating Rate Income (JFR) and Floating Rate Income Opportunity (JRO) had outstanding when-issued/delayed delivery purchase commitments of \$15,815,785, \$35,078,125 and \$15,540,250, respectively.

Investment Income

Dividend income is recorded on the ex-dividend date. Interest income, which reflects the amortization of premiums and includes accretion of discounts for financial reporting purposes, is recorded on an accrual basis. Interest income also reflects paydown gains and losses and fee income, if any. Fee income consists primarily of amendment fees. Amendment fees are earned as compensation for evaluating and accepting changes to an original senior loan agreement and are recognized when received. Other income includes the increase of the net realizable value of the receivable of matured senior loans during the current fiscal period.

Income Taxes

Each Fund is a separate taxpayer for federal income tax purposes. Each Fund intends to distribute substantially all of its net investment income and net capital gains to shareholders and to otherwise comply with the requirements of Subchapter M of the Internal Revenue Code applicable to regulated investment companies. Therefore, no federal income tax provision is required.

For all open tax years and all major taxing jurisdictions, management of the Funds has concluded that there are no significant uncertain tax positions that would require recognition in the financial statements. Open tax years are those that are open for examination by taxing authorities (i.e., generally the last four tax year ends and the interim tax period since then). Furthermore, management of the Funds is also not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly change in the next twelve months.

Notes to

Financial Statements (Unaudited) (continued)

Dividends and Distributions to Common Shareholders

Dividends to Common shareholders are declared monthly. Net realized capital gains from investment transactions, if any, are declared and distributed to shareholders at least annually. Furthermore, capital gains are distributed only to the extent they exceed available capital loss carryforwards.

Distributions to Common shareholders are recorded on the ex-dividend date. The amount and timing of distributions are determined in accordance with federal corporate income tax regulations, which may differ from U.S. GAAP.

Preferred Shares

The Funds are authorized to issue Preferred shares. As of July 31, 2010, Senior Income (NSL), Floating Rate Income (JFR) and Floating Rate Income Opportunity (JRO) redeemed all of their outstanding Preferred shares, at liquidation values of \$46,000,000, \$400,000,000 and \$240,000,000, respectively.

During the six months ended January 31, 2011, lawsuits pursuing claims made in a demand letter alleging that the Funds Board of Trustees breached their fiduciary duties related to the redemption at par of the Funds Preferred shares had been filed on behalf of shareholders of the Funds and against the Adviser, together with current and former officers and interested director/trustees of the Funds. Nuveen and the other named defendants believe these lawsuits to be without merit, and all named parties intend to defend themselves vigorously. The Funds believe that these lawsuits will not have a material effect on the Funds or on the Adviser s ability to serve as investment adviser to the Funds.

Common Shares Shelf Offering

During the six months ended January 31, 2011, Senior Income (NSL), Floating Rate Income (JFR) and Floating Rate Income Opportunity (JRO) each filed a registration statement with the Securities and Exchange Commission authorizing each Fund to issue additional 2.9 million, 4.7 million and 2.8 million Common shares, respectively, through an equity shelf offering.

During the six months ended January 31, 2011, Senior Income (NSL) and Floating Rate Income Opportunity (JRO) issued 1,072,309 and 925,494 Common shares, respectively, receiving offering proceeds, net of offering costs of \$7,541,517 and \$11,094,637, respectively. During the six months ended January 31, 2011, Floating Rate Income (JFR) did not issue any Common shares through its equity shelf program. Under these equity shelf programs, each Fund, subject to market conditions, may raise additional equity capital from time to time in varying amounts and offering methods at a net price at or above each Fund s net asset value per Common share.

Shelf Offering Costs

Costs incurred by the Funds in connection with the shelf offerings of their Common shares are recorded as a deferred charge which are amortized over the period such additional Common shares are sold not to exceed the one-year life of the shelf offering period.

Derivative Financial Instruments

Each Fund is authorized to invest in derivative financial instruments, including forwards, futures, options and swap transactions. Although each Fund is authorized to invest in such financial instruments, and may do so in the future, they did not make any such investments during the six months ended January 31, 2011.

Repurchase Agreements

In connection with transactions in repurchase agreements, it is each Fund s policy that its custodian take possession of the underlying collateral securities, the fair value of which exceeds the principal amount of the repurchase transaction, including accrued interest, at all times. If the counterparty defaults, and the fair value of the collateral declines, realization of the collateral may be delayed or limited.

Zero Coupon Securities

Each Fund is authorized to invest in zero coupon securities. A zero coupon security does not pay a regular interest coupon to its holders during the life of the security. Income to the holder of the security comes from accretion of the difference between the original purchase price of the security at issuance and the par value of the security at maturity and is effectively paid at maturity. The market prices of zero coupon securities generally are more volatile than the market prices of securities that pay interest periodically.

Custodian Fee Credit

Each Fund has an arrangement with the custodian bank whereby certain custodian fees and expenses are reduced by net credits earned on each Fund s cash on deposit with the bank. Such deposit arrangements are an alternative to overnight investments. Credits for cash balances may be offset by charges for any days on which a Fund overdraws its account at the custodian bank.

Borrowing Costs

Costs incurred by each Fund in connection with structuring its refinancing during the six months ended January 31, 2011, were recorded as a deferred charge which will be amortized through May 12, 2011, and is included as a component of Interest expense on borrowings and amortization of borrowing costs on the Statement of Operations.

Indemnifications

Under the Funds organizational documents, their officers and trustees are indemnified against certain liabilities arising out of the performance of their duties to the Funds. In addition, in the normal course of business, the Funds enter into contracts that provide general indemnifications to other parties. The Funds maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Funds that have not yet occurred. However, the Funds have not had prior claims or losses pursuant to these contracts and expect the risk of loss to be remote.

Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets applicable to Common shares from operations during the reporting period. Actual results may differ from those estimates.

2. Fair Value Measurements

In determining the fair value of each Fund s investments, various inputs are used. These inputs are summarized in the three broad levels listed below:

- Level 1 Quoted prices in active markets for identical securities.
- Level 2 Other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.).
- Level 3 Significant unobservable inputs (including management s assumptions in determining the fair value of investments).

The inputs or methodologies used for valuing securities are not an indication of the risk associated with investing in those securities. The following is a summary of each Fund s fair value measurements as of January 31, 2011:

			Level	
Senior Income (NSL)	Level 1	Level 2	3	Total
Investments:

3. Derivative Instruments and Hedging Activities

The Funds record derivative instruments at fair value, with changes in fair value recognized on the Statement of Operations, when applicable. Even though the Funds investments in derivatives may represent economic hedges, they are not considered to be hedge transactions for financial reporting purposes. The Funds did not invest in derivative instruments during the six months ended January 31, 2011.

4. Fund Shares

N/A Senior Income (NSL), Floating Rate Income (JFR) and Floating Rate Income Opportunity (JRO) redeemed all \$46,000,000, \$400,000,000 and \$240,000,000, respectively, of their outstanding Preferred shares as of July 31, 2010.

5. Investment Transactions

Purchases and sales (including maturities but excluding short-term investments) during the six months ended January 31, 2011, were as follows:

			Floating
		Floating	Rate
	Senior	Rate	Income
	Income	Income	Opportunity
	(NSL)	(JFR)	(JRO)
Purchases	\$ 126,943,484	\$ 319,993,328	\$ 192,232,860
Sales and maturities	119,565,276	314,452,561	193,786,448

6. Income Tax Information

The following information is presented on an income tax basis. Differences between amounts for financial statement and federal income tax purposes are primarily due to the treatment of paydown gains and losses, timing differences in recognizing certain gains and losses on investment transactions and, for Floating Rate Income (JFR) and Floating Rate Income Opportunity (JRO), recognition of premium amortization. To the extent that differences

arise that are permanent in nature, such amounts are reclassified within the capital accounts as detailed below. Temporary differences do not require reclassification. Temporary and permanent differences do not impact the net asset values of the Funds.

At January 31, 2011, the cost and unrealized appreciation (depreciation) of investments, as determined on a federal income tax basis, were as follows:

	Senior Income (NSL)	Floating Rate Income (JFR)	Floating Rate Income Opportunity (JRO)
Cost of investments	\$ 301,455,372	\$ 784,227,252	\$ 460,052,386
Gross unrealized: Appreciation Depreciation	\$ 15,529,248 (13,494,874)	\$ 42,208,545 (23,299,412)	\$ 27,102,388 (15,647,559)
Net unrealized appreciation (depreciation) of investments	\$ 2,034,374	\$ 18,909,133	\$ 11,454,829

Permanent differences, primarily due to federal taxes paid, paydowns, expiration of capital loss carryforwards and bond premium adjustments resulted in reclassifications among the Funds components of net assets at July 31, 2010, the Funds last tax year-end, as follows:

	Senior	Floating Rate	Floating Rate Income	
Paid-in-surplus	Income (NSL) \$ (14,268,135)	Income (JFR) \$ (28,157)	Opportunity (JRO) \$ (71,260)	
Undistributed (Over-distribution of) net investment income Accumulated net realized gain (loss)	2,415,593 11,852,542	(7,747,543) 7,775,700	(6,417,029) 6,488,289	

The tax components of undistributed net ordinary income and net long-term capital gains at July 31, 2010, the Funds last tax year end, were as follows:

			Floating
		Floating	Rate
	Senior	Rate	Income
	Income	Income	Opportunity
	(NSL)	(JFR)	(JRO)
Undistributed net ordinary income *	\$ 1,389,952	\$ 3,605,436	\$ 3,717,652

Undistributed net long-term capital gains

* Net ordinary income consists of net taxable income derived from dividends, interest, and net short-term capital gains, if any. Undistributed net ordinary income (on a tax basis) has not been reduced for the dividend declared on July 1, 2010, paid on August 2, 2010.

The tax character of distributions paid during the Funds last tax year ended July 31, 2010, was designated for purposes of the dividends paid deduction as follows:

			Floating
		Floating	Rate
	Senior	Rate	Income
	Income	Income	Opportunity
	(NSL)	(JFR)	(JRO)
Distributions from net ordinary income *	\$ 13,684,842	\$ 27,379,807	\$ 19,988,093
Distributions from net long-term capital gains			

* Net ordinary income consists of net taxable income derived from dividends, interest, and net short-term capital gains, if any.

Notes to Financial Statements (Unaudited) (continued)

At July 31, 2010, the Funds last tax year end, the Funds had unused capital loss carryforwards available for federal income tax purposes to be applied against future capital gains, if any. If not applied, the carryforwards will expire as follows:

	Senior Income (NSL)	Floating Rate Income (JFR)	Floating Rate Income Opportunity (JRO)
Expiration:			
July 31, 2011	\$ 10,704,255	\$	\$
July 31, 2013		819,145	30,377
July 31, 2014		2,934,270	2,151,577
July 31, 2015	1,002,070	9,492,118	5,017,841
July 31, 2016		183,234	1,294,188
July 31, 2017	8,900,332	21,620,554	13,760,353
July 31, 2018	29,264,459	67,020,214	46,332,843
Total	\$ 49,871,116	\$ 102,069,535	\$ 68,587,179

At July 31, 2010, the Fund s last tax year-end, \$14,207,781 of Senior Income s (NSL) capital loss carryforward expired.

The Funds have elected to defer net realized losses from investments incurred from November 1, 2009 through July 31, 2010, the Funds last tax year end, (post-October losses) in accordance with federal income tax regulations. Post-October losses are treated as having arisen on the first day of the current fiscal year:

			Floating
		Floating	Rate
	Senior	Rate	Income
	Income	Income	Opportunity
	(NSL)	(JFR)	(JRO)
Post-October capital losses	\$ 5,482,712	\$ 6,989,418	\$ 1,503,280

7. Management Fees and Other Transactions with Affiliates

Each Fund s management fee consists of two components a fund level fee, based only on the amount of assets within the Fund, and a complex-level fee, based on the aggregate amount of all eligible fund assets managed by the Adviser. This pricing structure enables Fund shareholders to benefit from growth in the assets within their Fund as well as from growth in the amount of complex-wide assets managed by the Adviser.

The annual fund-level fee for each Fund, payable monthly, is calculated according to the following schedule:

	(NSL)
	Fund-Level Fee
Average Daily Managed Assets*	Rate
For the first \$1 billion	.6500%
For the next \$1 billion	.6375
For the next \$3 billion	.6250
For the next \$5 billion	.6000
For managed assets over \$10 billion	5750

Floating Rate Income (JFR) Floating Rate Income Opportunity (JRO)

Fund-Level Fee Rate

Senior Income

Average Daily Managed Assets*	Fund-Level Fee Rate
For the first \$500 million	.6500%
For the next \$500 million	.6250
For the next \$500 million	.6000
For the next \$500 million	.5750
For managed assets over \$2 billion	.5500

The annual complex-level fee for each Fund, payable monthly, is calculated according to the following schedule:

	Effective Rate at Breakpoint
Complex-Level Managed Asset Breakpoint Level*	Level
\$55 billion	.2000%
\$56 billion	.1996
\$57 billion	.1989
\$60 billion	.1961
\$63 billion	.1931
\$66 billion	.1900
\$71 billion	.1851
\$76 billion	.1806
\$80 billion	.1773
\$91 billion	.1691
\$125 billion	.1599
\$200 billion	.1505
\$250 billion	.1469
\$300 billion	.1445

^{*} For the fund-level and complex-level fees, managed assets include closed-end fund assets managed by the Adviser that are attributable to financial leverage. For these purposes, financial leverage includes the funds—use of preferred stock and borrowings and certain investments in the residual interest certificates (also called inverse floating rate securities) in tender option bond (TOB) trusts, including the portion of assets held by a TOB trust that has been effectively financed by the trust—s issuance of floating rate securities, subject to an agreement by the Adviser as to certain funds to limit the amount of such assets for determining managed assets in certain circumstances. The complex-level fee is calculated based upon the aggregate daily managed assets of all Nuveen funds that constitute eligible assets. Eligible assets do not include assets attributable to investments in other Nuveen funds and assets in excess of \$2 billion added to the Nuveen Fund complex in connection with the Adviser—s assumption of the management of the former First American Funds effective January 1, 2011. As of January 31, 2011, the complex-level fee rate was .1835%.

The management fee compensates the Adviser for overall investment advisory and administrative services and general office facilities. The Adviser has entered into Sub-Advisory Agreements with Symphony under which Symphony manages the investment portfolios of the Funds. Symphony is compensated for its services to the Funds from the management fees paid to the Adviser.

The Funds pay no compensation directly to those of its trustees who are affiliated with the Adviser or to its officers, all of whom receive remuneration for their services to the Funds from the Adviser or its affiliates. The Board of Trustees has adopted a deferred compensation plan for independent trustees that enables trustees to elect to defer receipt of all or a portion of the annual compensation they are entitled to receive from certain Nuveen advised funds. Under the plan, deferred amounts are treated as though equal dollar amounts had been invested in shares of select Nuveen advised funds.

For the first ten years of Senior Income s (NSL) operations, the Adviser has agreed to reimburse the Fund, as a percentage of average daily managed assets, for fees and expenses in the amounts and for the time periods set forth below:

For the first eight years of Floating Rate Income s (JFR) operations, the Adviser has agreed to reimburse the Fund, as a percentage of average daily managed assets, for fees and expenses in the amounts and for the time periods set forth below:

Year Ending		Year Ending	
March 31,		March 31,	
2004 *	.32%	2009	.32%
2005	.32	2010	.24
2006	.32	2011	.16
2007	.32	2012	.08
2008	.32		

^{*} From the commencement of operations.

The Adviser has not agreed to reimburse Floating Rate Income (JFR) for any portion of its fees and expenses beyond March 31, 2012.

For the first eight years of Floating Rate Income Opportunity s (JRO) operations, the Adviser has agreed to reimburse the Fund, as a percentage of average daily managed assets, for fees and expenses in the amounts and for the time periods set forth below:

Year Ending		Year Ending	
July 31,		July 31 ,	
2004 *	.30%	2009	.30%
2005	.30	2010	.22
2006	.30	2011	.14
2007	.30	2012	.08
2008	.30		

^{*} From the commencement of operations.

The Adviser has not agreed to reimburse Floating Rate Income Opportunity (JRO) for any portion of its fees and expenses beyond July 31, 2012.

Notes to

Financial Statements (Unaudited) (continued)

During the six months ended January 31, 2011, the Adviser received commissions of \$15,364 and \$22,524, related to the sale of Common shares as a result of the Senior Income (NSL) and Floating Rate Income Opportunity (JRO) shelf offerings, respectively.

8. Senior Loan Commitments

Unfunded Commitments

Pursuant to the terms of certain of the variable rate senior loan agreements, the Funds may have unfunded senior loan commitments. Each Fund will maintain with the custodian, cash, liquid securities and/or liquid senior loans having an aggregate value at least equal to the amount of unfunded senior loan commitments. At January 31, 2011, Senior Income (NSL), Floating Rate Income (JFR) and Floating Rate Income Opportunity (JRO) had no unfunded senior loan commitments.

Participation Commitments

With respect to the senior loans held in each Fund s portfolio, the Funds may: 1) invest in assignments; 2) act as a participant in primary lending syndicates; or 3) invest in participations. If a Fund purchases a participation of a senior loan interest, the Fund would typically enter into a contractual agreement with the lender or other third party selling the participation, rather than directly with the Borrower. As such, the Fund not only assumes the credit risk of the Borrower, but also that of the selling participant or other persons interpositioned between the Fund and the Borrower. At January 31, 2011, there were no such outstanding participation commitments in any of the Funds.

9. Borrowing Arrangements

Each Fund has entered into a Revolving Credit and Security Agreement (Credit Agreement) with an affiliate of Citibank N.A. as a means of financial leverage. Each Fund s maximum commitment amount under its Credit Agreement is as follows:

			Floating
		Floating	Rate
	Senior	Rate	Income
	Income	Income	Opportunity
	(NSL)	(JFR)	(JRO)
Maximum commitment amount	75,500,000	209,500,000	120,000,000

As of January 31, 2011, each Fund s outstanding borrowings on its Credit Agreement was as follows:

			Floating
		Floating	Rate
	Senior	Rate	Income
	Income	Income	Opportunity
	(NSL)	(JFR)	(JRO)
Outstanding borrowings	73,950,000	197,740,000	117,270,000

During the six months ended January 31, 2011, the average daily balance outstanding and average annual interest rate on each Fund s Credit Agreement were as follows:

			Floating
		Floating	Rate
	Senior	Rate	Income
	Income	Income	Opportunity
	(NSL)	(JFR)	(JRO)
Average daily balance outstanding	73,950,000	197,740,000	117,270,000
Average annual interest rate	1.42%	1.42%	1.42%

In order to maintain these borrowing arrangements, the Funds must meet certain collateral, asset coverage and other requirements. Borrowings outstanding are fully secured by securities held in each Fund s portfolio of investments. Interest expense incurred on these borrowings, which is based on a commercial paper rate, is recognized as a component of Interest expense on borrowings and amortization of borrowing costs on the Statement of Operations. In addition to the interest expense, each Fund pays a .65% per annum program fee, based on the average daily outstanding balance and a .35% per annum liquidity fee, based on the total commitment amount of the borrowings through the renewal date, both of which are recognized as a component of Interest expense on borrowings and amortization of borrowing costs on the Statement of Operations. Borrowings outstanding are recognized as Borrowings on the Statement of Assets and Liabilities.

Reinvest Automatically, Easily and Conveniently

Nuveen makes reinvesting easy. A phone call is all it takes to set up your reinvestment account.

Nuveen Closed-End Funds Automatic Reinvestment Plan

Your Nuveen Closed-End Fund allows you to conveniently reinvest distributions in additional Fund shares.

By choosing to reinvest, you Il be able to invest money regularly and automatically, and watch your investment grow through the power of tax-free compounding. Just like distributions in cash, there may be times when income or capital gains taxes may be payable on distributions that are reinvested.

It is important to note that an automatic reinvestment plan does not ensure a profit, nor does it protect you against loss in a declining market.

Easy and convenient

To make recordkeeping easy and convenient, each month you 1l receive a statement showing your total distributions, the date of investment, the shares acquired and the price per share, and the total number of shares you own.

How shares are purchased

The shares you acquire by reinvesting will either be purchased on the open market or newly issued by the Fund. If the shares are trading at or above net asset value at the time of valuation, the Fund will issue new shares at the greater of the net asset value or 95% of the then-current market price. If the shares are trading at less than net asset value, shares for your account will be purchased on the open market. If the Plan Agent begins purchasing Fund shares on the open market while shares are trading below net asset value, but the Fund s shares subsequently trade at or above their net asset value before the Plan Agent is able to complete its purchases, the Plan Agent may cease open-market purchases and may invest the uninvested portion of the distribution in newly-issued Fund shares at a price equal to the greater of the shares net asset value or 95% of the shares market value on the last business day immediately prior to the purchase date. Distributions received to purchase shares in the open market will normally be invested shortly after the payment date. No interest will be paid on distributions awaiting reinvestment. Because the market price of the shares may increase before purchases are completed, the average purchase price per share may exceed the market price at the time of valuation, resulting in the acquisition of fewer shares than if the distribution had been paid in shares issued by the Fund. A pro rata portion of any applicable brokerage commissions on open market purchases will be paid by Plan participants. These commissions usually will be lower than those charged on individual transactions.

Flexible

You may change your distribution option or withdraw from the Plan at any time, should your needs or situation change.

You can reinvest whether your shares are registered in your name, or in the name of a brokerage firm, bank, or other nominee. Ask your investment advisor if his or her firm will participate on your behalf. Participants whose shares are registered in the name of one firm may not be able to transfer the shares to another firm and continue to participate in the Plan.

The Fund reserves the right to amend or terminate the Plan at any time. Although the Fund reserves the right to amend the Plan to include a service charge payable by the participants, there is no direct service charge to participants in the Plan at this time.

Call today to start reinvesting distributions

For more information on the Nuveen Automatic Reinvestment Plan or to enroll in or withdraw from the Plan, speak with your financial advisor or call us at (800) 257-8787.

Glossary of Terms Used in this Report

- n Average Annual Total Return: This is a commonly used method to express an investment s performance over a particular, usually multi-year time period. It expresses the return that would have been necessary each year to equal the investment s actual cumulative performance (including change in common share NAV or market price and reinvested dividends and capital gains distributions, if any) over the time period being considered.
- n *Collateralized Debt Obligations (CDOs):* Collateralized debt obligations are a type of asset-backed security constructed from a portfolio of fixed-income assets. CDOs usually are divided into different tranches having different ratings and paying different interest rates. Losses, if any, are applied in reverse order of seniority and so junior tranches generally offer higher coupons to compensate for added default risk.
- n *Market Yield (also known as Dividend Yield or Current Yield):* Market yield is based on the Fund s current annualized monthly distribution divided by the Fund s current market price. The Fund s monthly distributions to its shareholders may be comprised of ordinary income, net realized capital gains and, if at the end of the calendar year the Fund s cumulative net ordinary income and net realized gains are less than the amount of the Fund s distributions, a tax return of capital.
- n Net Asset Value (NAV): A Fund s NAV per common share is calculated by subtracting the liabilities of the Fund (including any Preferred shares issued in order to leverage the Fund) from its total assets and then dividing the remainder by the number of common shares outstanding. Fund NAVs are calculated at the end of each business day.

Not applicable to this filing.

ITEM 3. AUDIT COMMITTEE FINANCIAL EXPERT.

Not applicable to this filing.

ITEM 4. PRINCIPAL ACCOUNTANT FEES AND SERVICES.

Not applicable to this filing.

ITEM 5. AUDIT COMMITTEE OF LISTED REGISTRANTS.

Not applicable to this filing.

ITEM 6. SCHEDULE OF INVESTMENTS.

- (a) See Portfolio of Investments in Item 1.
- (b) Not applicable.

ITEM 7. DISCLOSURE OF PROXY VOTING POLICIES AND PROCEDURES FOR CLOSED-END MANAGEMENT INVESTMENT COMPANIES.

Not applicable to this filing.

ITEM 8. PORTFOLIO MANAGERS OF CLOSED-END MANAGEMENT INVESTMENT COMPANIES. Not applicable to this filing.

ITEM 9. PURCHASES OF EQUITY SECURITIES BY CLOSED-END MANAGEMENT INVESTMENT COMPANY AND AFFILIATED PURCHASERS.

Not applicable.

ITEM 10. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS.

There have been no material changes to the procedures by which shareholders may recommend nominees to the Registrant s Board implemented after the registrant last provided disclosure in response to this item.

ITEM 11. CONTROLS AND PROCEDURES.

- (a) The registrant s principal executive and principal financial officers, or persons performing similar functions, have concluded that the registrant s disclosure controls and procedures (as defined in Rule 30a-3(c) under the Investment Company Act of 1940, as amended (the 1940 Act) (17 CFR 270.30a-3(c))) are effective, as of a date within 90 days of the filing date of this report that includes the disclosure required by this paragraph, based on their evaluation of the controls and procedures required by Rule 30a-3(b) under the 1940 Act (17 CFR 270.30a-3(b)) and Rules 13a-15(b) or 15d-15(b) under the Securities Exchange Act of 1934, as amended (the Exchange Act) (17 CFR 240.13a-15(b) or 240.15d-15(b)).
- (b) There were no changes in the registrant s internal control over financial reporting (as defined in Rule 30a-3(d) under the 1940 Act (17 CFR 270.30a-3(d)) that occurred during the second fiscal quarter of the period covered by this report that has materially affected, or is reasonably likely to materially affect, the registrant s internal control over financial reporting.

ITEM 12. EXHIBITS.

File the exhibits listed below as part of this Form.

- (a)(1) Any code of ethics, or amendment thereto, that is the subject of the disclosure required by Item 2, to the extent that the registrant intends to satisfy the Item 2 requirements through filing of an exhibit: Not applicable to this filing. (a)(2) A separate certification for each principal executive officer and principal financial officer of the registrant as required by Rule 30a-2(a) under the 1940 Act (17 CFR 270.30a-2(a)) in the exact form set forth below: Ex-99.CERT attached hereto.
- (a)(3) Any written solicitation to purchase securities under Rule 23c-1 under the 1940 Act (17 CFR 270.23c-1) sent or given during the period covered by the report by or on behalf of the registrant to 10 or more persons: Not applicable. (b) If the report is filed under Section 13(a) or 15(d) of the Exchange Act, provide the certifications required by Rule 30a-2(b) under the 1940 Act (17 CFR 270.30a-2(b)); Rule 13a-14(b) or Rule 15d-14(b) under the Exchange Act (17 CFR 240.13a-14(b) or 240.15d-14(b)), and Section 1350 of Chapter 63 of Title 18 of the United States Code (18 U.S.C. 1350) as an exhibit. A certification furnished pursuant to this paragraph will not be deemed filed for purposes

of Section 18 of the Exchange Act (15 U.S.C. 78r), or otherwise subject to the liability of that section. Such certification will not be deemed to be incorporated by reference into any filing under the Securities Act of 1933 or the Exchange Act, except to the extent that the registrant specifically incorporates it by reference. Ex-99.906 CERT attached hereto.
